# PL 6

## UNIVERSAL TRANSPORT PLATFORM

### Easy loading of machinery and other materials

– thanks to the floor that is hydraulically lowered to the ground level.

### Additional security for transported materials

– thanks to special strap anchors. They also increase the stability of the platform during operation.

**Two axle versions** – rigid or steering.

**Ample space** – the standard loading area (6x2.4 m) can be optionally increased to 6x2.9 m.

**Easy manoeuvrability** – a movable hitch on a Category II or III beam reduces the turning radius.

**Optionally equipped with straight or special barriers** – for transporting bales, which increases its range of use.

**Rated load capacity of over 6 tonnes** – thanks to its robust construction and 45-millimetre thick planks.

**Safe driving and loading** – thanks to a mechanical transport lock and air brake system.

MODEL	PL 6 (RIGID AXLE)	PL 6 (STEERING AXLE)
Load capacity [kg]	6,200	6,100
Kerb weight [kg]	2,060	2,160
Total length [mm]	9,000	9,000
Width of loading area [mm]	standard	2,400
	with extension	2,900
Standard tyres	400/60-15.5	400/60-15.5

# UNIA

UNIA Sp. z o.o. is a Polish manufacturer offering the largest comprehensive range of products for the agricultural market in Europe. Member of Chemirol Group since 2023.

We have 4 state-of-the-art factories equipped with world-class manufacturing equipment, and a history and expertise dating back nearly 141 years. It was in our factory that the world's first cultivator and rotary plough was developed.

Our products, through specialised trading partners, reach farmers in more than 60 countries worldwide, on every continent.

With this knowledge, we offer our customers not only state-of-the-art machinery, but also the best agronomic solutions used in the most demanding world markets.

We offer a comprehensive range of agricultural equipment:

- storage and drying equipment
- sprayers and potato harvesters
- seed drills and combined cultivators
- ploughs and cultivators
- spreaders and manure spreaders
- balers and wrappers

# WE FOCUS ON GROWTH

- ▣ Precision farming
- ▣ Autonomous agriculture
- ▣ Sustainable agriculture
- ▣ No-tillage system
- ▣ Product and technology excellence
- ▣ Optimisation of the cereal storage system
